

LEARNING MODULE: Clinical Skill Awareness and Validation

For Clinical Students & Instructors
Greater Green Bay Healthcare Alliance

ggbha.org

Reviewed 6/14/2018

IMPORTANT!

This learning module must be reviewed by students and faculty annually (once per year).

REMINDER:

When reading the modules, please know you are accountable for understanding the information presented. If you have any questions, you will need to talk to your instructor/school/facility representative(s) to find out the answer(s) before going any further.

Student Clinical Skill Level

- The college has identified which clinical skills are applicable for each course.
- These clinical skills have been shared with the student within course objectives, outcomes, a syllabus, etc.

Student Clinical Skill Level

- The student is aware of the specific skills they may perform with guidance during each clinical experience.
- Students attest they will not perform skills that are out of the scope for each specific clinical course.

Faculty Responsibility Related to Student Clinical Skill Level

- A. The college has identified which clinical skills are applicable for each course.
- B. Faculty are aware of the specific skills students may perform with guidance during each clinical experience.
- C. Faculty attest they will not have students perform skills that are out of the scope for each specific clinical course.

Faculty Responsibility Related to Student Clinical Skill Level

At the beginning of each clinical day, faculty will provide the clinical area a list of skills the students have been taught that are within the scope of this clinical experience.
