### CASTLEBRANCH BRIDGES PRESENTATION

Two representatives from CastleBranch's Bridges presented on their online clinical placement program. A brochure for the program is attached with the minutes. The system provides a full service approach for all of the aspects of the clinical process for a student, including background check, placement and surveys. The systems has several features:

- Clinical Placement
- Clinical Scheduling
- Clinical Onboarding
- Clinical Evaluation
- Clinical Time Management

The Maryland Hospital Association started working with the organization to develop a system to enhance placement of clinical students. The software program is now being beta tested and will be available November 2016. Facilities create clinical placement opportunities. Schools can review opportunities and reserve placements. There is a feature that gives preferred status for colleges to have first priority over other schools.

Overall, the attendees felt that this type of online placement system is very valuable for the region. The company suggested having students pay for the system at a cost of \$25 per module or \$120 for the full platform (background checks are not included in the overall cost). There may be an opportunity for the healthcare organizations to partner with the educational institutions in offsetting the cost. Sharon shared that the myClinicalExchange rep will be presenting at the next Clinical meeting.

### OTHER BUSINESS

Laura had a question regarding who maintains the background checks for out-of-state clinical students. Members shared that the college maintains the background checks. Julie suggested tracking the degree for the Preceptor Agreement. There was discussion on having a subcommittee work on a form that identifies clinical student's ability skills sheet. The subcommittee members are Julie, Laura, Sharon and Brian.
